A curated design experience to remember

Hong Kong's increasingly vibrant and progressive design scene makes it the perfect environment in which to hold an event like Hong Kong Indesign. This landmark event fosters a culture of creativity and collaboration, and encourages the sharing of new ideas and knowledge. Importantly, it offers professionals and design lovers a curated experience of the best brands, designs and talents that this bustling city has to offer.

This year's event sees the introduction of two new programmes. Design Conversations makes its debut here as a panel-based discussion series where the region's best-in-category designers and thought-leaders will share insights on important issues impacting the industry. We also shine the spotlight on emerging design talents from the region in Launch Pad Asia, an initiative that's being brought to Hong Kong for the very first time.

We hope you enjoy this highly experiential design journey.
